Introduction :: Albania

Background:

Albania declared its independence from the Ottoman Empire in 1912, but was conquered by Italy in 1939. Communist partisans took over the country in 1944. Albania allied itself first with the USSR (until 1960), and then with China (to 1978). In the early 1990s, Albania ended 46 years of xenophobic communist rule and established a multiparty democracy. The transition has proven challenging as successive governments have tried to deal with high unemployment, widespread corruption, dilapidated infrastructure, powerful organized crime networks, and combative political opponents. Albania has made progress in its democratic development since first holding multiparty elections in 1991, but deficiencies remain. International observers judged elections to be largely free and fair since the restoration of political stability following the collapse of pyramid schemes in 1997; however, each of Albania's post-communist elections have been marred by claims of electoral fraud. The 2009 general elections resulted in a coalition government, the first such in the country's history. Albania joined NATO in April 2009 and is a potential candidate for EU accession. Although Albania's economy continues to grow, the country is still one of the poorest in Europe, hampered by a large informal economy and an inadequate energy and transportation infrastructure.

Flag description:

red with a black two-headed eagle in the center; the design is claimed to be that of 15th-century hero George Castriota SKANDERBEG, who led a successful uprising against the Turks that resulted in a short-lived independence for some Albanian regions (1443-78); an unsubstantiated explanation for the eagle symbol is the tradition that Albanians see themselves as descendants of the eagle; they refer to themselves as "Shkypetars," which translates as "sons of the eagle"

National symbol(s):

double-headed eagle

National anthem:

name: "Hymni i Flamurit" (Hymn to the Flag)

Economy :: Albania

Economy - overview:

Albania, a formerly closed, centrally-planned state, is making the difficult transition to a more modern open-market economy. Macroeconomic growth averaged around 6% between 2004-08, but declined to about 3% in 2009-11, and 0.5% in 2012. Inflation is low and stable. The government has taken measures to curb violent crime, and recently adopted a fiscal reform package aimed at reducing the large gray economy and attracting foreign investment. Remittances, a significant catalyst for economic growth declined from 12-15% of GDP before the 2008 financial crisis to 8% of GDP in 2010, mostly from Albanians residing in Greece and Italy. The agricultural sector, which accounts for almost half of employment but only about one-fifth of GDP, is limited primarily to small family operations and subsistence farming because of lack of modern equipment, unclear property rights, and the prevalence of small, inefficient plots of land. Energy shortages because of a reliance on hydropower - 98% of the electrical power produced in Albania - and antiquated and inadequate infrastructure contribute to Albania's poor business environment and lack of success in attracting new foreign investment needed to expand the country's export base. FDI is among the lowest in the region, but the government has embarked on an ambitious program to improve the business climate through fiscal and legislative reforms. The completion of a new thermal power plant near Vlore has helped diversify generation capacity, and plans to upgrade transmission lines between Albania and Montenegro and Kosovo would help relieve the energy shortages. Also, with help from EU funds, the government is taking steps to improve the poor national road and rail network, a long-standing barrier to sustained economic growth. The country will continue to face challenges from increasing public debt,

having slightly exceeded its former statutory limit of 60% of GDP in 2012. Strong trade, remittance, and banking sector ties with Greece and Italy make Albania vulnerable to spillover effects of the global financial crisis.

Transnational Issues :: Albania

Disputes - international:

none

Refugees and internally displaced persons:

stateless persons: 7,443 (2012)

Trafficking in persons:

current situation: Albania is a source country for men, women, and children subjected to sex trafficking and forced labor; Albanian victims of sexual exploitation are trafficked within Albania and in Greece, Italy, Macedonia, Kosovo, Belgium, the Netherlands, Germany, Switzerland, Ireland, and the UK; some Albanian women become sex trafficking victims after accepting offers of legitimate jobs; Albanian children are forced to beg or perform other forms of forced labor; Filipino victims of labor trafficking were identified in Albania during 2012

tier rating: Tier 2 Watch List - Albania does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government decreased its trafficking investigations, prosecutions, and convictions over the last year and, because of inconsistent implementation of operating procedures, continues to punish victims for unlawful acts that are a direct result of being subjected to sex trafficking; the high turnover rate of law enforcement personnel prevents progress at the local level in identifying and protecting trafficking victims; removal of the national anti-trafficking coordinator hinders efforts to implement the 2011 national action plan against trafficking; the government provides limited funding to NGO shelters (2013)

Illicit drugs:

increasingly active transshipment point for Southwest Asian opiates, hashish, and cannabis transiting the Balkan route and - to a lesser extent - cocaine from South America destined for Western Europe; limited opium and expanding cannabis production; ethnic Albanian narcotrafficking organizations active and expanding in Europe; vulnerable to money laundering associated with regional trafficking in narcotics, arms, contraband, and illegal aliens
